---

Are you particularly unhappy about this analysis?

I would of course add that the bill for each rad is not presented for payment immediately, but is stretched out over ~~many~~ posterity, perhaps peaking at about 10 generations. But we can't apply a conventional discount rate analysis, except insofar as we develop the compensatory research meanwhile to forfend the costs.

If \$500 per rad doesn't suit you, what number would you use?

SAM-230, 222

9/71
